- Additive Manufacturing technologies, in particular selective laser sintering (process of adding layers of thermoplastic polymer melted on the surface by a laser, in defined areas) and stereolithography (process of adding layers of a liquid thermosetting polymer, solidified on the surface by a laser, in defined areas);

- Vacuum molding systems (vacuum molding process of thermosetting polymers in handcrafted silicone molds starting from a model obtained from Additive Manufacturing or milling);

- Molding through the use of injection presses for thermoplastic polymers or aluminum alloys (die casting).
